

Selise Wordpress Assessment Exam, June 24, 2022

Time: 4 Hour

Total Marks: 100 (80 Assignment +20 Viva)

Let's think of an online book store called boibitan who sells digital books and physical books online . You have to create a book selling platform using wordpress and woocommerce where shop owners can sell books online like rokomari.com

1. Admin can create downloadable and physical books product
2. User will order books
3. If a user order 3 books at a time he/she will get 10% discount on total price
4. Admin can generate coupon code to give fixed discount on any occasion
5. The owner has another system from where he want to read an order report from a rest api endpoint, this api will have the following fields:

**Order Number, User Email, Product Name, Quantity and Order Date**

You have to create a plugin to create the above rest api endpoint. Create a child theme of woocommerce storefront to display and list books.
